

# NAG Numerical Functions for GPUs Function Document

## nag\_gpu\_depthbb\_cleanup

### 1 Purpose

**nag\_gpu\_depthbb\_cleanup** frees system resources which were allocated by a previous call to `nag_gpu_depthbb_init` or `nag_gpu_depthbbinc_init`.

### 2 Specification

```
#include <nag_gpu.h>
void nag_gpu_depthbb_cleanup (Nag_Gpu_Comm *comm)
```

### 3 References

None.

### 4 Arguments

- 1: **comm** – Nag\_Gpu\_Comm \* *Communication Data*  
Nag\_Gpu\_Comm is a NAG defined type which holds state and communication information and must not be modified in any way.  
The structure which was initialized by a previous call to `nag_gpu_depthbb_init` or `nag_gpu_depthbbinc_init`.

### 5 Error Indicators and Warnings

No argument constraint checking is carried out by this function.

### 6 Example

None.
